1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

Page D250

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superlifer" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" determinations in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Supertite" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnam element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel Applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

PI 8530 DRG 100	ST1587 MAHLE								

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 6. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 7. Does not meet OE specifications. 8. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

NOTES

NOTES

NanoForce™

AF899 NF

AF879 NF

NanoForce AF879 NF and AF899 NF air filters deliver the cleanest combustion air possible for large construction and mining engines. Nanofiber, when combined with newly enhanced pleating and pleat stabilization, delivers optimal air filter performance for superior engine protection and a low cost of equipment operation.

Nothing Guards Like Fleetguard

Service Parts

8265S Copper washer; Used with: LF516

116029S O-ring; Used with Fleetguard 500 and 750 series bypass lube filter housings

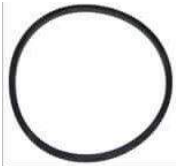

132730SB Bulk package; (100) of 132730S

142784S Fuel filter head; Head used with FS1212, FF213, FF105C, FF105D, FF105, FF104, FS1000; Replaces 256348S

145664SB Bulk package; (500) of 3301385S

150037S Hold-down spring for 500 and 750 housing assemblies.

151884S Gasket; Used with: FF108, FF221, FF218

151940S Housing Assembly; Used with: FF108

153518S Bolt Seal; Used with: LF516

153717S Turbo head; Used with: LF632B

154272S Crankcase breather with steel stamped housing and cover with AF250 element; Uses service part(s) 3302527S, 3318125S Used with: AF250

154711S Fuel Filter Head; Used with: FF105

156779S Crankcase breather with steel stamped housing and cover, AF250 element, stopper fit, and chain on cover; Uses service part(s) 3318125S; Used with: AF250

156780S Same as 156779S without chain; Uses service part(s) 3318125S

156810S Crankcase breather; Uses service part(s) 3302527S, 3318125S

161917S Crankcase breather; Element for 156810S

161917SB Bulk package; (100) of 161917S

164159S Cover gasket; Used with: LF500, LF750A, LF750B, LF750C; Replaces 250992S

164159SB Bulk package; (100) of 164159S

173368S Gasket; Used with: LF516, LF613, LF509N; Replaces 257232S; Used with the following head and shell combinations:

ENGINE	HEAD	SHELL
V6-140	252917	189977
V8-185	252917	189977
N & NH	177058	184386

V12	199797	184386
J	199917	184386
J & C	177058	184386

173368SB Bulk package; (100) of 173368S

193302S O-Ring; Used with: LF613; Replaces 256691S; Used the following Cummins head shell combinations:

HEAD	SHELL
166400	166422
167991	166422
168032	173178
175623	173178
175623	551680
175624	551680
181726	551681
551102	551681

Overall Height: 0.15 (4)
Largest OD: 5.66 (144)
Largest ID: 5.36 (136)
Cross Section: Round

202592S Gasket

204163S Water filter spin-on head; Replaces 256926S

E. PRODUCT GUIDE

212013S

Dual fuel filter head; Head used with FF104, FF105, FF213, FS1212

215617S

Dual water filter head; Uses 256535S mounting bracket

250024

Gasket

250024S

Cover gasket; Used with: AF250

250301S

Gasket

250383S

Gasket; Used with: FF107

250457S

Gasket

250806S

Service Gasket; One inch OD flat air filter bolt seal

250843S

Snap ring; Used with: FF108

250856S

Coupling assembly for use on LF500 and LF750 by-pass housing assemblies with the exception of 252281S; Used with: LF500, LF750A, LF750B, LF750C; Also used on 10 quart power steering reservoir.

251081S

Square washer for capscrew 1/2"; Used with: FF108

251091S

Shell assembly; Used with: FF108

251139S

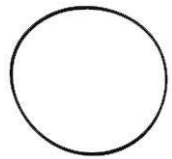

O-Ring; Used with: HF6088

251152S

By-pass spring (relief valve located in bottom of shell); Used with: LF502, LF516

251311S

CATERPILLAR 6F9163; Gasket Used with: LF519

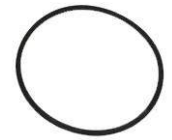

Overall Height: 0.12 (3)
Largest OD: 5.44 (138)
Largest ID: 5.2 (132)
Cross Section: Rectangular

251390S

Rubber cover gasket; Used with: FF108, FS1201

251390SB

Bulk package; (100) of 251390S.

251919

Coolant Immersion Heater 6' Replacement cord 120V; Used with: FH23002; Replaces 251919C

252011S

Spring for 2 & 4 quart power steering reservoirs; Used with: 255730S, 254385S

252193S

Fuel System Service Part; Housing used with FF178

252598S

Rubber cover gasket; Used with: FF178, 254385S

253152S

Bracket assembly for 254385S housing; Used with: 254385S

254064S

Crankcase Breather; Internal retaining screens for 156810S

254329S

Gasket

254387S

Dipstick for use on 4-quart power steering reservoir 254385S; Used with: 254385S

254503S

Gasket

254608S

Gasket; For 255180S and 257014S crankcase breathers

255180S

Crankcase breather for turbo applications; Uses service part(s) 255183S, 3302527S

255183S

Crankcase breather element; Used with: 255180S assembly

255721S

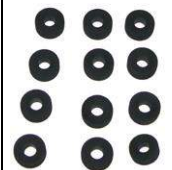

Dipstick for use on 2-quart power steering reservoir 255730S

255737S

Vented dipstick for 10-quart power steering reservoir 251431S

255815S

Gasket for 255180S, 156810S, and 257014S crankcase breathers

E. PRODUCT GUIDE

<p>255816S Crankcase breather washer</p> 	<p>257542S Valve assembly used in 256546S; Consists of 257541S and 3302010S</p> 	<p>259225 Coolant Immersion Heater for Detroit Diesel 750W/120V</p> 
<p>256172S Housing used with FS1201 Fuel</p> 	<p>257715S Water filter head 204163S and bracket assembly</p> 	<p>259225C Coolant Immersion Heater for Detroit Diesel 750W/120V **CSA Approved</p> 
<p>256421S Spring for 256546S fuel/ water separator housing</p> 	<p>258127S Housing cover; (1 pack of 258092)</p>	<p>259229C Coolant Immersion Heater for Caterpillar 1000W/120V **CSA Approved</p> 
<p>256424S Shell assembly for fuel/ water separator housing assembly 256546S (black); Replaces 256423S, 3304896S</p> 	<p>258814S Reinforced mounting bracket Used with: LF750A, LF750B, LF750C</p>	<p>259231C Coolant Immersion Heater for Caterpillar 1500W/120V **CSA Approved</p> 
<p>256535S Mounting bracket for 204163S and 215617S water filter heads, 142784S, 3304315S and 212013S fuel filter heads.</p> 	<p>259083S Capscrew used on 4-quart power steering reservoir with metal cover; Used with: 255730S, 254385S</p> 	<p>259246 Extension Cord 120V 15FT Replaces 257120</p> 
<p>256546S Housing used with FS1201 Fuel/water separator housing assembly (black cover and shell) (FS1201 element); Replaces 3300430S, 3300431S</p> 	<p>259204 Coolant Immersion Heater for Cummins 1000W/120V</p> 	<p>259247 Extension Cord 120V 25FT</p> 
<p>257014S Crankcase breather with steel stamped housing and cover; two-stage filtration, Scott foam element (257419S); Uses service part(s) 3302527S Used with: AF251; Replaces 255806S</p> 	<p>259205 Coolant Immersion Heater for Cummins 1000W/240V</p> 	<p>259248 Extension Cord 120V 50FT</p> 
<p>257419S Crankcase Breathers; Vapor element used with 255180S or 257014S; Replaces 3304880S</p> 	<p>259211 Coolant Immersion Heater for Caterpillar, Detroit Diesel, and Fiat Allis 1000W/120V</p> 	<p>259250 Waterproof Remote Plug 240V **CSA not required</p>
<p>257541S Vent valve for use on fuel/ water separator housing assembly</p> 	<p>259211C Coolant Immersion Heater for Caterpillar, Detroit Diesel, Fiat Allis 1000W/120V **CSA Approved</p> 	<p>259296 Replacement heating element for 259268 coolant tank heater 750W/120V **CSA Approved</p>
	<p>259214 Coolant Immersion Heater for Detroit Diesel 1000W/120V</p> 	<p>259302 Replacement heating element for 259274 water-tight coolant tank heater 1500W/120V</p> 
	<p>259216 Coolant Immersion Heater for Detroit Diesel 1500W/120V</p> 	<p>259305 Coolant Tank Replacement Heating Element **CSA Approved</p>
	<p>259218 Coolant Immersion Heater for Detroit Diesel 1000W/120V</p> 	<p>259307 Replacement heating element for 259279 water-tight coolant tank heater 2000W/120V</p>
		<p>259310 Replacement heating element for 259282 coolant tank heater 2000W/480V **CSA Approved</p>

E. PRODUCT GUIDE

<p>259311 Replacement heating element for 259283 coolant tank heater; 2250W/120V</p> 	<p>259371 Start Kit; **CSA not required</p> 	<p>323344S Gasket; Used with: HF6054</p> 
<p>259317 Replacement heating element for 259289 coolant tank heater; 4000W/480V **CSA Approved</p> 	<p>259372 Start Kit; **CSA not required</p> 	<p>330818S Gasket Pack</p> <p>Overall Height: 0.22 (5) Largest OD: 2.83 (72) Largest ID: 2.46 (63) Cross Section: Rectangular</p>
<p>259319 Universal replacement tank for coolant tank heaters; 3.5 X 17.5 inches</p>	<p>259373 Start Kit; **CSA not required</p>	<p>333763S Gasket; Used with: HF6184, HF6079, HF6165</p> 
<p>259334 Coolant Tank Heater; Replacement Thermostat Sensing Unit; **CSA Approved</p>	<p>259375 12CC Mechanical Start Kit **CSA not required</p>	<p>394694S Hump Hose; Used with: AK17</p>
<p>259346 Atomizer for some Cummins and Detroit Diesel engines; **CSA not required</p> 	<p>259377 Thermal switch (100 degrees) 1/2" NPT for electric kits; **CSA not required; Replaces 259355</p> 	<p>3300518S Band wrench for 5 inch O.D. spin-ons</p> 
<p>259350 Atomizer for some Cummins and Perkins engines over 500 cid. **CSA not required</p> 	<p>259379C Coolant Immersion Heater for some Caterpillar and Detroit Diesel engines; 1500W/120V; **CSA Approved</p> 	<p>3300922S Spin-on full flow adaptor for Cummins engines 1969 and after; (Uses LF670 element after conversion)</p> 
<p>259352 Atomizer; Replaces 259347, 259347S; **CSA not required</p> 	<p>259384 Ether Start Kit; **CSA not required</p> 	<p>3301387S Strap; For bulk, see 145665SB; Used with: LF500, LF750A, LF750B, LF750C</p>
<p>259354 Atomizer for some Cummins and International Harvester industrial engines; **CSA not required</p> 	<p>259386 Start Kit; **CSA not required</p>	<p>3301603S Copper seal used with 2-quart power steering reservoirs with metal covers; Used with: 255730S</p> 
<p>259367 6cc valve for electric ether start kits **CSA not required</p> 	<p>259387 Start Kit; **CSA not required</p>	<p>3301922S Vented dipstick 10-quart power steering reservoir</p> 
<p>259369 48" Nylon tubing for use with ether start kits; **CSA not required</p> 	<p>259390S 6-hole gasket for use with Cummins coolant heaters; **CSA not required</p> 	<p>3301949S 11.3 inch capscrew; Used with: LF516</p> 
<p>259370 Start Kit; **CSA not required</p> 	<p>317237S Cover gasket; Used with: HF6118, LF509N</p> 	<p>3301954S 14 inch capscrew; Used with: LF516</p> 
	<p>317506S Gasket</p>	<p>3302009S Capscrew; Used with: FF108</p> 

E. PRODUCT GUIDE

3302134S Stat-o-seal washer; Used with: LF509N

3302180S Gasket for use on Cummins crankcase breathers 257014S and 255180S

3302367S Fuel filter head; Head used with FF202, FS1216, FS1006

3302527S Wing nut for use with some crankcase breathers; Used with: 154272S, 156810S, 257014S, 255180S; Replaces 250026S

3302657 Low Pressure Ether Cyl. 90 psi. (Non-US); (For Canada use 259345 only)

3302696 84" Control Cable; **CSA not required

3302698 Cylinder Clamp; **CSA not required

3302699 Compression Sleeve; **CSA not required

3302700 90 degree Valve Fitting; **CSA not required

3303104 Coolant Immersion Heater for Mack 1500W/120V

3303104C Coolant Immersion Heater for Mack 1500W/120V **CSA Approved

3303311 Atomizer; Replaces 259351, 259353; **CSA not required

3303427S O-Ring used with some Cummins block heaters; Used with: 3309188

3303779 12-24V Electric Ether Starting Kit; Uses service part(s) 3303899S; Replaces 259342; **CSA not required

3303780 Mechanical Starting Fluid Kit to 450 CID; Uses service part(s) 3303899S; **CSA not required

3303781 Mechanical Starting Fluid Kit 450 to 900; Uses service part(s) 3303899S; Replaces 3310868; CID **CSA not required

3303782S Low restriction spin-on head, remote mount; Uses service part(s) 3312054S; Used with: LF670

3303897 Triplex Cord - 120V

3303897C Triplex Cord; **CSA Approved

3303899S Cork gasket for use with ether cylinder; Used with: 3310588, 3830394, 3303779, 3830396, 3303780, 3303781, 3313273, 3830397, 3316413, 3830395

3303975S Fuel System Service Part; Hex Nut Fam 9,13

3304015 12CC Manual Valve

3304016 12CC Electric Valve; **CSA Approved

3304017 TE Connector for Ether Valve; C W Aids Union **T; **CSA Approved

3304018 Electric Starting Fluid System Switch; **CSA Approved

3304173S Adaptor head, remote mount; Head used with LF777; Replaces 3308726S

3304274S Inlet and outlet fitting for use with Detroit Diesel; converts from 7/8"-14UNF to 3/8"NPT; Used with: FF202

3304865 Ammeter; **CSA not required

3304868 Generator Brushes (DC Starter); **CSA not required

3305315S Wing screw for 2-quart and 4-quart power steering reservoir; Used with: 255730S, 254385S

3305647 Coolant Immersion Heater for Detroit Diesel 1500W/120V

3305647C Coolant Immersion Heater for Detroit Diesel 1500W/120V; **CSA Approved

E. PRODUCT GUIDE

3305648 Coolant Immersion Heater for Detroit Diesel 1500W/240V

3305648C Coolant Immersion Heater for Detroit Diesel 1500W/240V

3305996S Gasket; Used with: HF6054

3305997S Gasket; Used with: HF6054

3306001S Gasket; Used with: HF6054

3306006 1000W/120V Block Heater for Detroit 8.2L, V-8, 501 CID and Cummins ISC, ISL engine; Replaces 259229

3306006C Coolant Immersion Heater for Detroit 8.2L engine 1000W/120V; Navistar/ International 444E and T444E 1994 models and newer; **CSA Approved

3306007 Coolant Immersion Heater for Detroit 8.2L 1000W/240V; Replaces 259230

3307046 Economy Model Tank Heater 1500W/120V

3307059 Economy Tank Heater 1000W/120V; **CSA Approved

3307060 Economy Model Tank Heater; 2000W/120V; **CSA Approved

3307454S Head + Bowl; Bulk tank fuel filter (gasohol); Housing used with FF246; Uses service part(s) 3307455S; Replaces 3305728S

3307455S Replacement bowl; Used with: 3307454S

3307647S Spring used in 250825S and 250826S; replaced 150037S in these applications

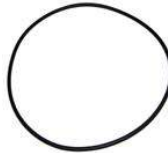

3307670 Coolant Immersion Heater for Caterpillar and Detroit Diesel 1000W/120V

3307672 Coolant Immersion Heater for Caterpillar 1500W/120V

3308112S Gasket; Used with: FF191

3308694S CATERPILLAR 5P3092; Gasket; Used with: HF6083

3308927S Dipstick used in 3308935S power steering reservoir; Used with: 254385S

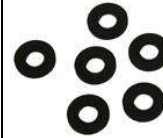

3308928S Dipstick used in 2-quart power steering reservoir; Used with: 255730S

3308929S Cover assembly used on 4-quart power steering reservoir; Used with: 254385S

3309054S Seal assembly in 2-quart and 4-quart power steering reservoirs; Used with: 255730S, 254385S

3309188 Coolant Immersion Heater for Cummins L-10 and M-11; 1500W/120V; Uses service part(s) 3303427S, 3835426S

3309188C Coolant Immersion Heater for Cummins L10; 1500W/120V; **CSA Approved

3309189 Coolant Immersion Heater for Cummins L-10 and M-11; 1500W/240V

3309190 Coolant Immersion Heater for Mack; 1500W/120V

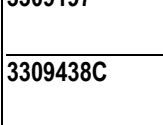

3309190C Coolant Immersion heater for Mack; 1500W/120V; **CSA Approved

3309196 Coolant Immersion Heater for Mack; 1500W/120V

3309197 Coolant Immersion Heater for Mack; 1500W/240V

3309438C Igniter Switch for 30,000 BTU; Propane Tank Heater

3309490S Replacement O-ring gasket for use with self-venting drain valve screws used on all Superfilter Plus fuel/water separator assemblies; Used with: FS1242B

3309738 Coolant Immersion Heater for Cummins; 1500W/120V; Replaces 259364, 259364C, 3302795

E. PRODUCT GUIDE

3309738C Coolant Immersion Heater for Cummins. 1500W/120V; **CSA Approved

3309739 Coolant Immersion Heater for Cummins; 1500W/240V; Replaces 259382

3310049S Gasket for use with some block heaters

3310063 Replacement Heater Element 1500W/120V; Replaces 259376

3310063C Replacement Immersion Heater Element; 1500W/120V; **CSA Approved

3310064 Replacement Heater Element 1500W/240V; Replaces 259378

3310400C Coolant Immersion Heater for Cummins V 1500W/120V

3310401C Coolant Immersion Heater for Cummins V 1500W/240V

3310404 Coolant Immersion Heater for Agricultural Applications 600W/120V

3310478C 10' Replacement Cord 120V; **CSA Approved; Replaces 3310478

3310553 Oil Pressure Switch; **CSA Approved

3310587S Cutter for spin-on filters; Replacement blades are not sold

3310588 12 Volt E-Z Mount Start Kit; Uses service part(s) 3303899S; **CSA not required

3310591 E-Z Mount Valve; **CSA not required

3310593 Atomizer; Replaces 3301593; **CSA not required

3310629S

Mounting bracket for 4-quart power steering reservoir; Used with: 254385S

3310750 Temperature Control

3310751C Coolant Immersion Heater for IHC 1250W/120V; **CSA Approved

3310776S Gasket

3310777S Gasket

3310858 Coolant Immersion Heater for Cummins. 1500W/120V (With Cord); See 3310839 for heater only; Replaces 251902, 259206

3310858C Coolant Immersion Heater for Cummins; 1500W/120V; **CSA Approved; Replaces 208833, 208833C

3310859 Coolant Immersion Heater for Cummins; 1500W/240V; Replaces 259207

3311468S Strap wrench

3311505S Remote mount head; Head used with FF5018, FF5052, FS1221, FS1251, FS1235

3311815 Remote Plug-In W/Cord

3312054S Bracket; Used with: HH6975, 3303782S, 3314849S

3312091S Head to convert Detroit Diesel 12 and 16 cylinder engines; Used with: FF5036

3312097S Gasket for use with some hydraulic filters; Used with: HF6704; To upgrade, use 3830112S; (Rectangular cross section)

3312307S 2-quart power steering reservoir gasket; Used with: 255730S; Replaces 250389, 250389S

Overall Height: 0.07 (2)
Largest OD: 5.1 (130)
Largest ID: 4.37 (111)
Cross Section: Rectangular

3312308S 2-quart power steering reservoir cover; Used with: 255730S; Replaces 3308930S

3312715S Gasket

3312925 Replacement Element for 3312920; **CSA Approved

3312928 Replacement Element for 3312923; **CSA Approved

3312933 Replacement Element for 3312930

3312934 Replacement Element for 3312931

3312942 100-120 degree thermostat

3312943 120-140 degree thermostat

3313182 Coolant Immersion Heater for IHC
9L; 1000W/120V; 1993 and older

3313268 Coolant Immersion Heater for
Perkins; 600W/120V; Replaces
258160; **CSA Approved

3313270 Coolant Immersion Heater for
Agricultural Applications;
400W/120V

3313272 Coolant Immersion Heater for
Consolidated Dsl. 750W/120V

3313272C Coolant Immersion Heater for
Consolidated Dsl. 400W/120V;
**CSA Approved

3313273 12 Volt Ether Start Kit; Includes
atomizers 3303311, 259350,
259346; Uses service part(s)
3303899S; **CSA not required

3313274 All Purpose Magnetic Heater;
**CSA not required

3313276 Battery Warmer Blanket; **CSA
Approved

3314250S Gasket for use with some Gresen
heads. ("L" Shape); Used with:
HF6059, HF6720, HF6060;
Replaces 3308163S

3314849S Remote mount head; Head used
with HF6243, HF6318; Uses
service part(s) 3312054S

3316406 10', 120V Weather Proof Plug and
Cord

3316408 Coolant Immersion Heater for
Case; 1500W/120V

3316409 Coolant Immersion Heater for
John Deere; 1000W/120V

3316410 Atomizer; **CSA not required

3316413 12 Volt Electric Starting Kit
250-450 CID; Uses service part(s)
3303899S; **CSA not required

3321978S	Fitting instructions for PTC Heater Kit
3323007S	Gasket used with fuel filters; Used with: FF146 Overall Height: 0.12 (3) Largest ID: 2.89 (74) Cross Section: Rectangular
3323008S	Optional gasket. Enclosed with FF528; Used with: FF147, FF5054  Overall Height: 0.12 (3) Largest ID: 3.72 (95) Cross Section: Rectangular
3323009S	Optional Gasket; Used with: FF147, FF146  Overall Height: 0.12 (3) Largest ID: 2.99 (76) Cross Section: Round
3323483S	Nylon tubing, used for cold weather aids; Packaged 150 meters of tubing per carton
3324564S	Optional gasket; Used with: FF147  Overall Height: 0.12 (3) Largest ID: 3.86 (98) Cross Section: Round
3328464S	Gasket
3328567S	Gasket; Used with: HF6449
3328568S	Gasket; Used with: HF6449
3329059S	Electric cable for heater; 2 conductors, no tape

3624915	Copper Gasket
3625120S	Used with: LF4072 Optional gasket; Only for RABA engine-Application IKARUS bus
382137	Fuel/Water Separator
3825403	Tank Heater; 1000W/240V 
3825406C	5' Replacement Cord; 120V; **CSA Approved 
3825408	3CC Mechanical Ether Kit (B Series); **CSA not required
3825411	Heater (C Series) 1000W/120V; Uses Cummins gasket 3910517; Replaces 3825411C 
3825414C	1/2" Oil Pan Heater; 150W/120V; **CSA Approved 
3825415C	1" Oil Pan Heater 150W/120V; **CSA Approved 
3825416	22MM Oil Pan Heater 150W/120V 
3825417C	1/2" Oil Pan Heater; 300W/120V; **CSA Approved 
3825418C	1" Oil Pan Heater 300W/120V; **CSA Approved 

3825419C	22MM Oil Pan Heater; 300W/120V; **CSA Approved 
3825421	22MM Oil Pan Heater; 300W/240V 
3825422	1/2" Oil Pan Heater; 450W/120V 
3825423	1/2" Oil Pan Heater; 300W/240V 
3825424	120V Y-Cord with Thermostat 
3825760	Coolant Immersion Heater for Cummins C Series 1000W/240V; Replaces 3841699 
3826037	12cc 12-24 volt Ether Start Kit for KV12 & KV16 engine w/side mounted aftercooler; **CSA Approved 
3826255	Coolant Immersion Heater for Cummins B Series; 750W/240V; Replaces 3841698 
3826337S	Mounting bracket for 2-quart power steering reservoir; Used with: 255730S; Replaces 252015S 

E. PRODUCT GUIDE

<p>3826362S Small O-ring; Used with: LF3000</p> 	<p>3830400 6cc Valve for 24V E-Z Mount Start Kit; **CSA not required</p>	<p>3832350S Viton Gasket</p> <p>Overall Height: 0.1 (3) Largest OD: 1.88 (48) Largest ID: 1.67 (43) Cross Section: Round</p>

3833700S Air inlet stack cap for use with air cleaners

3834123S Remote mount head (1-5/16 inch inlet/outlet); Head used with LF3000; Replaces 3834124S

3834185S Replacement gasket for PTC fuel heater kits; Used with: 3837317S, 3847102S; To upgrade, use 3958485S; Replaces 3832053S

Overall Height: 0.17 (4)
Largest OD: 2.74 (70)
Largest ID: 2.46 (62)
Cross Section: Rectangular

3834217S Water in fuel indicator kit for Superfilter Plus product line; (For use on 12 volt DC systems only); Uses service part(s) 3834335S; Used with: FS1242B

3834335S Replacement WIF sensor for use with clear bowl used on the Superfilter Plus fuel filter/water separator assemblies; 24V DC CUMMINS 3613643; Used with: FS1242K, 3834217S

3834513 Coolant Immersion Heater for Cummins K-Series 1500W/120V

3834513C Coolant Immersion Heater for Cummins K-Series; 1500W/120V; **CSA not required; Replaces 254890, 254890C

3834514 Coolant Immersion Heater for Cummins K-Series; 1500W/240V

3834558S Oil Analysis Kit; Replaces 3317369S

3834694 Replacement Heating Element for 3317938 Tank Heater

3835118S Cummins 3943780 Threaded insert to use heater with Superfilter Plus line with 3833198S and 3905661S heads; Used with: 3837317S

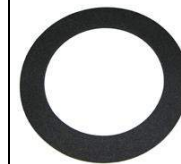

3835425 Atomizer; **CSA not required

3835426S Hexagonal Nut Package; **CSA not required; Used with: 3309188

3835604A Starting Fluid; **CSA not required

3835841S Gasket (foam gasket with adhesive on one side); (5.416 ID/7.610 OD/.265 thick); Used with: AF253, AF1650; Replaces 3831594S

3835842S Gasket (foam gasket with adhesive on one side); (7.716 ID/10.155 OD/.252 thick); Used with: AF1650, AF253; Replaces 3831595S

E. PRODUCT GUIDE

3836029AS

Complete fuel heater installation kit (300 watt/12 volt); Used with: FS1242B, FS1242K; Gaskets Included: 3837316S & 3834185S; **CSA Approved; Replaces 3836029S

3836032S

Fuel heater element for 3836029S kit (300 watt); Includes 3834185 gasket

3836091S

Remote mount head (1-5/8 straight threads inlet/outlet); Head used with LF3000

3836095S

Remote mount multiport head for Cummins applied fuel filter (3/8 NPT inlet/ outlet)

3836165S

"L" shaped gasket for John Deere application RE41257; Used with: LF3317

3836258

Starter Fluid; Not available in Europe; Sold in the USA only

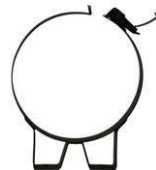

3836308S

Hump hose for use with air cleaners

3836931S

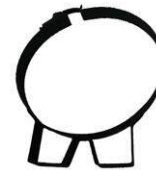

Mounting clamps for ECO-SE air cleaners

3836932S

Mounting clamps for ECO-SE air cleaners

3836933S

Mounting clamps for ECO-SE air cleaners

3836943S

Inlet adaptor for ECOII air cleaners

3836945S

Inlet adaptor for ECOII air cleaners

3836947S

Combination water separator and inlet adaptor for ECOII air cleaners

3836948S

Combination water separator and inlet adaptor for ECOII air cleaners

3836950S

Combination water separator and inlet adaptor for ECOII air cleaners

3836951S

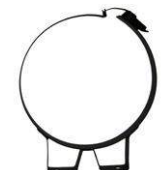

Mounting clamp for ECOII air cleaners

3836952S

Mounting clamp for ECOII air cleaners

3836953S

Used with: AH19036 Mounting clamp for ECOII air cleaners

3836954S

Pressure tap sleeve with service indicator for ECOII air cleaners

3836955S

Pressure tap sleeve with service indicator for ECOII air cleaners

3836956S

Pressure tap sleeve with service indicator for ECOII air cleaners

3836957S

Pressure tap sleeve with service indicator for ECOII air cleaners

3837317S

Retrofit adaptor kit for use of Superfilter Plus heater with existing Cummins fuel filter head. (Includes gaskets, adaptor disk, threaded insert, industrial loctite); Uses service part(s) 3834185S, 3835118S

3838228S

CATERPILLAR 6D9157; Gasket; Used with: HF6202, HF6344; Gasket(s): 3838228

3838229S

CATERPILLAR 8F8882; Gasket; Used with: HF6097; Gasket(s): 3838229

3838290S

Band wrench; Used with: LF691A

3841697

Coolant Immersion Heater for Caterpillar 3176; 1500W/120V; **CSA Approved; Replaces 259231

3841701

Coolant Immersion Heater for Caterpillar 3116; 1000W/120V; **CSA Approved

3841702

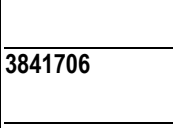

Coolant Immersion Heater for Detroit 60 Series; 1500W/120V; **CSA Approved; Replaces 259379

3841703

Coolant Immersion Heater for Detroit 60 Series; 1500W/240V

3841704

Weatherproof Receptacle Bracket (Square); **CSA not required

3841706

Coolant Immersion Heater for Ford 6.6 & 7.8L; 1250W/240V

3841707

Coolant Immersion Heater for Ford 6.6 & 7.8L; 1250W/120V

E. PRODUCT GUIDE

3841708

Coolant Immersion Heater for Mack E7; 1500W/120V

3841710

Heatsticker (Flexible Hot Pad Heater); 150W/120V; **CSA not required

3841879S

Fuel Strainer used With FS1251; Used with: 3889182S, 3889181S

3843722S

Cord w/Thermostat used on 3847102S and 3894689S fuel system service parts; Used with: 3847102S, 3894689S

3845400S

Service Kit, Fuel Strainer Screen (Includes 3841883 Lock Nut and 3842021 Gasket); Used with: 3847102S, 3889181S, 3889182S

3845969

12cc/24V valve starting Kit (12V version use 3826037); **CSA not required

3845970

12cc/24V valve starting kit (12V version use 259385); **CSA not required

3845971

24 volt valve starting kit (12V version use 259384); **CSA not required

3846568S

Remote mount lube filter head for Cummins C series; (LF3000 element used)

3846751

Filter crusher for use on larger truck filters or multiple smaller filters

3846752

Filter crusher for extremely high volume applications

3847102S

Cummins Fuel Strainer for Mid-range engines; Complete assembly; Uses service part(s) 3834185S, 3843722S, 3845400S, 3928013S.

3847372S

Clamp Fastener Package; Used with: AF25005

3847940S

CUMMINS 3932595; Cord, W/Thermostat

3848717S

Head Assembly for Cummins Marine applications

3848869

Remote Mount Filter Minder Gauge (35" restriction)

3888619

12V EZ Mount Start Kit; **CSA not required

3888706

Contamination Monitor which includes printer, carrying case, batteries, trace heating element, lamp, printer paper and ribbon, DC adaptor and fuse

3888707

Industrial sensor with 5 - 26 GPM flow rate @ 6000 PSI

3888708

Industrial sensor rated at 21 - 100 GPM flow rate @ 6000 PSI

3888709

Single point sampler with carrying case and two hook- up hoses

3889181S

FORD F4HZ9162B; Uses service part(s) 3841879S, 3845400S; Complete assembly

3889182S

Fuel Strainer for Consolidated Diesel Co; Uses service part(s) 3841879S, 3845400S; Complete assembly

3889493S

Threaded Insert

3889513S

CUMMINS 3889513; Hydraulic Filter Head

3889610

CUMMINS 196520; Die Cut Media Disk Valve; Quantity 10,000

3889610S

Die Cut Media Disk Valve; Quantity 500

3890011S

Fuel Filter Head

3890105S

CUMMINS 3681120; Gasket service pack; Used with: WF2125

3890242C

Coolant Immersion Heater for Onan 500W/120V; **CSA Approved; Replaces 3318907

3890243C

Coolant Immersion Heater for Onan 1000W/120V; **CSA Approved; Replaces 3318908

3890244C

Coolant Immersion Heater for Onan 1000W/240V; **CSA Approved

3890245C

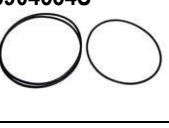

Coolant Tank Heater for Onan 1500W/120V; **CSA Approved (Thermostat 100 to 120 degrees); Replaces 3318906

E. PRODUCT GUIDE

3890246C  Coolant Immersion Heater for Onan 1500W/240V; **CSA Approved	3894967S  CASE 401849A1 Valve and Sensor; Used with: FS19519, FS19519V	3896692  Coolant Tank Heater; 1500W/120V; Replaces 259273, 259274; **CSA Approved
3890247C  Coolant Immersion Heater for Onan 1800W/120V; **CSA Approved	3894971S  Gasket; Used with: CH44105	3896693  Coolant Tank Heater; 1500W/240V; Replaces 259275, 259276; **CSA Approved
3890248C  Coolant Immersion Heater for Onan 2000W/240V; **CSA Approved	3894972S  Service gasket of CH44105, CH44120	3896694  Coolant Tank Heater 1500W/480V; Replaces 259277; **CSA Approved
3891506S  Insert, reducer	3894973S  Service gasket of CH44105, CH44115, CH44120 Overall Height: 0.21 (5) Largest OD: 6.02 (153) Largest ID: 5.6 (142) Cross Section: Round	3896695  Coolant Tank Heater; 2000W/120V; Replaces 259278, 259279; **CSA Approved
3892256 Heat Transfer Fluid Additive	3894975S  Service Kit for Centrifuge Includes (1) Rotor O-Ring, (1) Cone Stack Assembly, (1) Baffle Assembly, (1) CSA Turbine Can, (1) Can nut, (1) Jet Nut, and (1) FG Rotor shaft sub assembly; Used with: CH44105, CH44110, CH44115, CH44120	3896696  Coolant Tank Heater; 2000W/240V; Replaces 259280, 259281; **CSA Approved
3892460 Oberg P100WM; Fuel System Service Part	3894976S  Shell Assembly; Used with: CH44115, CH44105, CH44110	3896697  Coolant Tank Heater; 2000W/480V; Replaces 259282; **CSA Approved
3892646S  Remote mount head w/metric threads M14 X 1.5 -6H for Superfilter Plus Filters; Uses service part(s) 3933978S	3894977S  Clamp; Used with: CH44120, CH44105	3896698  Coolant Tank Heater; 2250W/120V; Replaces 259283, 259284; **CSA Approved
3893692S  Head & O-ring; 6B & L10 Engines Cummins 3606711; Head used with NG5900	3895540S  Hydraulic Filter Head; Replaces ST101106	3896699  Coolant Tank Heater; 2500W/240V; Replaces 259285, 259286; **CSA Approved
3893762C Fleetcool Concentrate Additive	3895546S Hydraulic Filter Head	3896700  Coolant Tank Heater; 2500W/480V; Replaces 259287; **CSA Approved
3893866S  O-ring Plug; (2) Cummins 3943645	3895593S Hydraulic Filter Head	3896701  Coolant Tank Heater; 4000W/240V; Replaces 259288, 3317938; **CSA Approved
3894499  Immersion Heater; 1250 Watt 120 Volt; Replaces 3310751, 3833070; **CSA Approved	3895630S  Head and Filter Assembly	
3894901S  CUMMINS 3942357; Temperature Sensor for 12V heater used on Cummins ISB spin-on fuel filter	3896018 Universal Concentrate Additive	

E. PRODUCT GUIDE

<p>3896702 Coolant Tank Heater; 4000W/480V; Replaces 259289; **CSA Approved</p> 	<p>3897714 Replacement heating element for 3896697 coolant tank heater; 2000W/480V; **CSA Approved</p> 	<p>3901993S Service gasket for Federal Express fuel filter 3901342; Used with: FF5392</p>
<p>3896706 Coolant Tank Heater; 4000W/480V; Replaces 3312923; **CSA Approved</p> 	<p>3897715 Replacement heating element for 3896698 coolant tank heater; 2250W/120V; **CSA Approved</p> 	<p>3902309 Fuel filter head; Uses service part(s) 3902309S</p> 
<p>3896707 Hazardous Location Heater; 2500W/120V; Replaces 3312930</p> 	<p>3897716 Replacement heating element for 3896699 coolant tank heater; 2500W/240V; **CSA Approved</p> 	<p>3902309S Uses service part(s) 3933978S; Used with: 3917480, 3902309; Fuel filter head M16 x 1.5 for FF5074 type; Replaces 3321305S</p> 
<p>3896709 Coolant Tank Heater; 1500W/120V; Replaces 3312936; **CSA Approved</p> 	<p>3897717 Replacement heating element for 3896700 coolant tank heater; 2500W/480V; **CSA Approved</p> 	<p>3903853 Hydraulic Filter Head</p>
<p>3896710 Coolant Tank Heater; 2500W/120V; Replaces 3312937; **CSA Approved</p> 	<p>3897719 Replacement heating element for 3896702 coolant tank heater; 4000W/480V</p> 	<p>3903914 CUMMINS 3680963, TEMRO 3510028; Oil Pan Heater w/cord 450W/125V</p>
<p>3896711 Coolant Tank Heater; 2500W/240V; Uses service part(s) 3897726; Replaces 3312938; **CSA Approved</p> 	<p>3897720 Replacement heating element for 3896703 coolant tank heater; 2000W/480V; **CSA Approved</p> 	<p>3903916 CUMMINS 3688555, TEMRO 3510012; 1500W/120V Engine Block Heater w/cord; Cummins Signature 600 & ISX</p> 
<p>3896722S Threaded Adaptor</p> 	<p>3897726 Used with: 3896711 Replacement heating element for 3896711 coolant tank heater; 2500W/240V; **CSA Approved</p> 	<p>3904378S Water Filter Head; Severe Duty</p> 
<p>3897183S Gasket kit containing 1 carton gasket, 1 rubber gasket and washers; Used with: HF6449; In Europe, use with HF6449</p> 	<p>3898526S 12V Thermostat ; Used with: FS1010, FH23001, FH23000, FH23300, FH23301; Replaces 3892526S</p> 	<p>3904554S Gasket Package; Used with: FS1010, FH23000, FH23300, FH23301</p> 
<p>3897709 Replacement heating element for 3896692 coolant tank heater; 1500W/120V; **CSA Approved</p> 	<p>3899371S CUMMINS 3942627; Head Casting</p> 	<p>3904837S SY-KLONE 901K1; Kit to Install Self-cleaning Pre-cleaner on equipment with 3"/3.5"/3.75" Intake Size; Used with: AP8403, AP8409</p> 
<p>3897710 Replacement heating element for 3896693 coolant tank heater; 1500W/240V; **CSA Approved</p> 	<p>3899452S 100ft. of 1/4 diameter polyethylene tubing; Used with: CC2802</p> 	<p>3904838S SY-KLONE 901K2; Kit to install Self-cleaning Pre-cleaner on equipment with 4"/4.5"/4.75"/5" Intake Size; Used with: AP8403, AP8409</p> 
<p>3897711 Replacement heating element for 3896694 coolant tank heater; 1500W/480V; **CSA Approved</p> 	<p>3901457S Fuel Filter Adapter To Convert FF167 C.A.V. Cartridge to use FS1235 spin-on; Replaces 3900940</p> 	<p>3904839S SY-KLONE 901K3; Kit to install Self-cleaning Pre-cleaner on equipment with 5.25"/5.5"/6" Intake Size; Used with: AP8403, AP8409</p> 
<p>3901867S CUMMINS 3943649; Heater</p>		

E. PRODUCT GUIDE

3904840S SY-KLONE 902K5; Kit to install Self-cleaning Pre-cleaner on equipment with 5"/5.25"/5.5" Intake Size; Used with: AP8404, AP8410

3904841S SY-KLONE 902K6; Kit to Install Self-cleaning Pre-cleaner on equipment with 6.25"/6.5"/7" Intake Size; Used with: AP8404, AP8410

3904842S SY-KLONE 903K9; Kit to Install Self-cleaning Pre-cleaner on equipment with 7"/9" Intake Size; Used with: AP8410, AP8404

3905073S SY-KLONE 902K7; Kit to Install Self-cleaning Pre-cleaner on equipment with 9" Intake Size; Used with: AP8405, AP8406

3905074S SY-KLONE 903K10; Kit to Install Self-cleaning Pre-cleaner on equipment with 10"/11" Intake Size; Used with: AP8405, AP8406

3905161S Direct Mount Filter Minder; Restriction Gauge; Replaces 3304584S

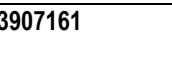

3905573S Replacement hinged plastic Cover; Used with: CC2805

3905830S Mounting Band w/ 10" bolt pattern; Used with: AH1152

3907161 Oil Pan Heater; 1/2" Oil Pan Htr 150W/120V; 3825414C without heater cord

3907721 Remote Mount Head; Head used with LF3729

3907721S CUMMINS 3944897; Hydraulic Filter Head; Used with: LF3970

3909058S Mounting Band; Used with: AH19048, AH19049

3910200S Replacement Bowl; Used with: AP2000

3910300S Replacement Bowl; Used with: AP3000

3910312 Thermostat for use with coolant tank heaters; Includes 4 ft. cord 80 to 100 degrees Fahrenheit 27 to 38 degrees Celsius (Uses 3910316 Sensing Unit); Replaces 259290, 259291; **CSA Approved

3910313 Thermostat for use with Coolant tank heaters; Includes 4 ft. cord 100-120 degrees Fahrenheit 38 to 49 degrees Celsius (Uses 3910317 Sensing Unit); Replaces 259292; **CSA Approved

3910314 Thermostat for use with coolant tank heaters; Includes 4 ft. cord 120-140 degrees Fahrenheit 49 to 60 degrees Celsius; (Uses 3910318 Sensing Unit); Replaces 259293, 259294; **CSA Approved

3910315 Thermostat for use with coolant tank heaters; Includes 4 ft. cord 140-160 degrees Fahrenheit 60 to 71 degrees Celsius; (Uses 3910319 Sensing Unit); Replaces 259295, 259368; **CSA Approved;

3910316 Sensing unit for use with 3910312 Thermostat 80 to 100 degrees Fahrenheit 27 to 38 degrees Celsius; **CSA Approved

3910317 Sensing Unit for use with 3910313 Thermostat 100-120 degrees Fahrenheit 38 to 49 degrees Celsius; **CSA Approved

3910450S Replacement Bowl; Used with: AP4500

3910500S Replacement Bowl; Used with: AP5000

3911025S Remote Mount Filter Minder Air Filter Restriction Gauge (25" Gauge); Replaces 3303943S

3911026S Remote Mount Filter Minder Air Filter Restriction Gauge (35" Gauge)

3911277S CUMMINS 3944685; Plate

3911940S Sensor; Used with: FH23000, FH23001, FH23002, FH23003, FH23300, FH23301, FS1040, FS1007 WIF

3912384S Gasket service pack; Contains 1 small o-ring for fill cap and 1 large o-ring for bowl; Used with: FF5369, FS1029, FS19536, FF5369W, FS1029W

3912703S O-Ring; Used with: 3915556S, 3915420S

3912717S Fuel Filter Head; Head used with FS19512, FS19511, FS19511B

3912970 NEW HOLLAND 86512435; Fuel Tank Filter

3913023S Viton Gasket

Overall Height: 0.1 (3)
Largest OD: 1.13 (29)
Largest ID: 0.92 (23)
Cross Section: Round

NELSON Q27354; 11" Stainless Steel Mounting Band

3918230S

NELSON Q27375; 11.8" Mild Steel Mounting Band; Used with: AH19080

3918231S

NELSON Q27164; 12.1" Mild Steel Mounting Band; Used with: AH19069, AH19070

3918232S

NELSON Q27283; 13" Mild Steel Mounting Band

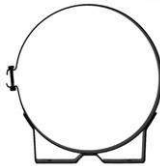

3918233S

NELSON Q27284; 13" Stainless Steel Mounting Band

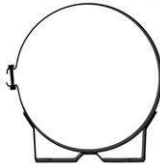

3918234S

NELSON Q27378; 14" Mild Steel Mounting Band; Used with: AH19071, AH19072

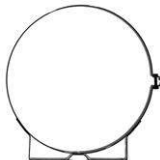

3918235S

NELSON Q27228; 15" Mild Steel Mounting Band

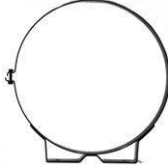

3918236S

NELSON Q27379; 16" Mild Steel Mounting Band; Used with: AH19073, AH19074, AH19036

3918237S

NELSON Q27167; Used with: AH19075, AH19076; 18.1" Mild Steel Mounting Band

3918240S

SY-KLONE 90RK00; Kit to Install Self-cleaning Pre-cleaner on equipment with 2 1/2.5"/2.75" Intake Size; Used with: AP8408

3918242S

SY-KLONE 66070; Used with: AH19074 Adapter; To use Pre-cleaner AP8410

3918243S

SY-KLONE 80R70; Used with: AP8406 8" to 7" reducer for AP8406

3918244S

SY-KLONE 68010; Used with: AH19076 Adapter; To use Pre-cleaner AP8405 / AP8406

3918245S

SY-KLONE 60R50; Self-cleaning pre-cleaner installation kit/reducer to reduce from 6 inches to 5 inches

3918643

CUMMINS 3607923; Natural Gas

3918732S

Elbow link for Air Filter restriction gauge

3918985S

Dust Cover Gasket for Stanadyne Fuel Managers; Used with: FS19516, FS19517, FS19525, FS19526, FS19530, FS19531

Overall Height: 0.14 (4)
Largest OD: 3.7 (94)
Largest ID: 3.0 (76)
Cross Section: Irregular

3919025S

CUMMINS 4920120; Rectangular Gasket for fuel heater for ISM options FF2267 and FF2270; replacement fuel heater kit number 393457300; Replaces 3324385S

Overall Height: 0.24 (6)
Largest OD: 2.76 (70)
Largest ID: 2.46 (63)
Cross Section: Rectangular

3919147S

RACOR 21620; Replacement bowl; Used with: FS1281

3919181

Bilge Boy 7.5 gpm with 115 VAC / 1P / 60Hz

3919182

Bilge Boy 7.5 gpm with 220 VAC / 1P / 60Hz

3919184

Bilge Boy 2.5 gpm with 115 VAC / 1P / 60Hz

3919185

Bilge Boy 2.5 gpm with 220 VAC / 1P / 60Hz

3920134

Fuel Filter Head; Head used with FS19511, FS19511B, FS19512

3920138S

Reducing Sleeve; Used with: AP2000

3920175S

Reducing Adaptor; Used with: AP2000

3920523S

SY-KLONE 64050; Used with: AH19068; Adapter for use with AH19068 Air Hsg.; To use Pre-cleaner AP8403 / AP8409

3920913

NELSON 88472N; 15.0 GPM Multiple Commercial Style KoalescerT Element

Overall Height: 26.06 (662)
End 1 OD: 4.5 (114)
End 2 OD: 4.34 (110)
End 1 ID: 3.47 (88)
End 2 ID: 3.3 (84)

3922053

Fuel Strainer

Overall Height: 3.7 (94)
Largest OD: 1.91 (48)
Outlet Connection: 7/8-14
Inlet Connection: 7/8-14

E. PRODUCT GUIDE

<p>3923650S Anti Drainback Valve; Used with: FH23000, FH23001, FH23002, FH23003, FH23300, FH23301</p> 	<p>3927719S Replacement Bowl; Used with: FS1291, FS19547</p> 	<p>3929722S Filter minder gauge</p> 
<p>3923820 Fuel Filter Head</p>	<p>3927776S ENGINEERING PRODUCTS CO. EW5650100410; Filter Minder fuel gauge with T fitting for #8 hose; Used with: 3925199S; Replaces 3901435S, 3926099S</p> 	<p>3930200S Reducer</p> 
<p>3923925S Nylon tubing, used for cold weather aids; 150 meters of tubing per carton; Replaces 3323483S</p> 	<p>3927871S Filter Wrench for 4.2" OD size elements</p> 	<p>3930225S Reducer</p> 
<p>3924758S CUMMINS 3607921; Natural gas element and gasket Service pack includes element 3924758 and gasket 3924757</p> 	<p>3927995S Gasket Pack; Used with: LF670</p>	<p>3930250S Reducer</p>
<p>3925199S Fuel Filter Restriction Gauge (Includes fitting for direct mount-1/8-27 NPT Threads); Uses service part(s) 3927776S; Replaces 3892576S, 3892577S</p> 	<p>3928013S Heater Kit; Used with: 3847102S, 3889183S, 3894689S, 3962763, 3930335S Uses service part(s) 3914853</p> 	<p>3930335S Head and Heater and Thermostat; Uses service part(s) 3928013S</p> 
<p>3926129S Plunger</p>	<p>3928341 Coolant Heater; Cummins ISB & QSB (750 W/120V)</p> 	<p>3930618S Fuel Filter Head; Head used with FF105, FS1212, FS1000; Gasket(s): 255622; Replaces 3304315S</p>
<p>3926660S Gasket</p> 	<p>3928544S WIF Sensor; Used with: FS19584</p> 	<p>3930708S Daylight plate; Used with: CC2806</p> 
<p>3926763S Cummins/Komatsu B 3.3L engine; Perma-Cool 111; Used for applications where the engine requires the lube filter to be remote mounted; Adapts the oil filter landing on the engine block to an oil passage for use with a remote mount lube filter; Used with: LF3855</p> 	<p>3929113 Kit containing a Blind plate 3929124 + a gasket 3328464 for LF 777 Head</p>	<p>3930885 Head and filter assembly; Element for FS19596</p>
<p>3926764 Cummins/Komatsu B 3.3L engine; 120V, 400W heater; 392676400; Package includes 5 Star #10443 for the frost plug and #11443 for the heater</p> 	<p>3929251S Gasket; Used with: HF6718, HF6733, HF6749, HH6951, HH6953, HH6954, HH6955, HH6956, HH6959, HH6960, HH6961, FS1285</p> <p>Overall Height: 0.19 (5) Largest OD: 4.98 (126) Largest ID: 4.42 (112) Cross Section: Rectangular</p> 	<p>3930939 T-connector for ether valve & cylinder</p> 
<p>3927023S 24 Volt, 300 Watts Heater (Fuel Kit for fuel heater for ISM Options FF2267 and FF2270; replacement heater kit number 393457300); Replaces 3905598S</p> 	<p>3931308S Gasket(s): 3320128, 3328464, 3931312, 3931313; Gaskets kit including 2 O-Ring gaskets 393131000 & 393131100, 1 gasket 393131300 and 1 washer 393131200; For SCANIA 4 series trucks; To be used with LF3730</p>	<p>3931659 Lube Filter 100,000 service interval filter used in LF9667 applications</p> <p>Overall Height: 10.39 (264) Largest OD: 4.24 (108) Thread Size: 1 1/8-16 UN-2B</p>

E. PRODUCT GUIDE

3931661 Lube Filter 100,000 service interval filter used in LF9620 applications	3934300S  CUMMINS 4920119; Thread Adaptor Insert for fuel heater for ISM options FF2267 and FF2270; Replacement fuel heater kit 393457300; Replaces 3321610S	3935421S Cover Assembly; Used with: AH19257 
3931662 Lube Filter 100,000 service interval filter used in LF9000 applications	3934304S Electrical cable for PTC heater kits : 3934299, 3934467, 3934572, 3934573; Used with: 3934299, 3934467, 3934572, 3934573; Is included in FH21101, FH21102, FH21045, FH21040, FH21098, FH21099, FH21047, FH21103	3935422S Cover Assembly; Used with: AH19266 
3932494S Cover Assembly; Used with: AH19262, AH19263 	3934450S CASE NEW HOLLAND 2830455; Fuel Filter Head	3935607 CUMMINS 3959608; Head and Filter Assembly 
3932495S Metal mounting bracket; Used with: AH19262, AH19263 	3934467 PTC heater kit - 24 V - Replaces 3917480 & 3321732S; Uses service part(s) 3934304S	3935659 Tank Heater Heating Element 
3933037S CHRYSLER 5093122AA; Fuel Water Separator Housing	3934469S CUMMINS 4920118; Aluminum Adapter for Cummins fuel heater kit for ISM options FF2267 and FF2270; Replacement fuel heater kit number 393457300; Replaces 3321608S	3935743S ENGINEERING PRODUCTS CO. EY5650301410; Fuel Minder Gauge and fitting #10 hose; Has a diaphragm with cloth backing that allows the gauge to operate under higher vacuum; This diaphragm will allow this gauge to be used on all Cummins, Caterpillar, and Detroit Diesel engines; Replaces 3927777S 
3933191 Fuel Filter Head	3934572 PTC heater kit - 24 volts - Replacing the 3923883; Uses service part(s) 3934304S	3936328 Urea Tote
3933191S Fuel Head for Fuel Island Filtration 	3934573 Fuel Heater kit - 24 V for ISM options FF2267 and FF2270; Uses service part(s) 3934304S; Replaces 3898339	3936434 Head and filter assembly Overall Height: 9.23 (234) Overall Length: 5.77 (147) Overall Width: 6.49 (165)
3933344S Gasket Overall Height: 0.14 (4) Largest OD: 1.64 (42) Largest ID: 1.36 (35) Cross Section: Round	3934841S SCANIA 392654; Gasket; Used with: LF3895, LF16228	3936434S FWS Housing
3933350 Clamp 	3935185S O-Ring; To upgrade, use 3958484S Overall Height: 0.14 (4) Largest OD: 2.76 (70) Largest ID: 2.48 (63) Cross Section: Round	3936445S Used on 13" plastic air cleaner Used with: AH19273, AH19274 
3933711S 25" Minder Gauge 1/8 male to male fitting; Is included in 3946045, 3941642 	3935261S Housing Assembly; Used with: CH41100	3936509S CUMMINS 3321617; Fuel Heater Kit includes wiring harness; Replaces 3321617S 
3933746S 20" Minder Gauge 1/8 male to male fitting 	3935262S Base and Shaft Assembly; Used with: CH41100, CH41101, CH41102	3937557S Nelson 87904F; Power Steering Filter Overall Height: 2.73 (69) Overall OD: 3.38 (86) End 1 ID: 2.0 (51)
3933978S Plug M14x1.5 and washer; Used with: 3892646S, 3918190S, 3902309S, 3944660S 	3935293S Housing Assembly; Used with: CH41100	3937616S Fuel/water separator housing assembly; Housing used with FS19625 Width: 7.34 (186)
3934299 PTC heater kit 24 volt; Uses service part(s) 3934304S; Replaces 3321659S		

E. PRODUCT GUIDE

3937860 CUMMINS 3966139; Head used with FS19608 Head and filter assembly

3937862 CUMMINS 3966140; Head and Filter Assembly; (Uses FS19616 Element)

3938140S Mounting Bracket; Used with: CV50106

3938161S Thread Adapter Insert; Used with: FS20000

3938173S FS20000 Lubricity Enhancing Filter & Head assembly; Uses service part 3940777S

3938495S Mounting

3938835S WIF

3938954 Strainer

3939391S Breather

3939392S Dip Stick Port Boss Adaptor for all Cummins M11 & ISM11 engines

3939393S O-Ring Assembly

3939396S SY-KLONE 40R35; A flanged insert for the installation of Self-cleaning pre-cleaners

3939397S SY-KLONE 40R375; A flanged insert for the installation of Self-cleaning pre-cleaners

3939399S SY-KLONE 50R45; A flanged insert for the installation of Self-cleaning pre-cleaners

3939401S SY-KLONE 60R525; A flanged insert for the installation of Self-cleaning pre-cleaners

3939403S SY-KLONE 30R275; A flanged insert for the installation of Self-cleaning pre-cleaners

3939404S SY-KLONE 30R25; A flanged insert for the installation of Self-cleaning pre-cleaners

3939406S SY-KLONE 20R175; A flanged insert for the installation of Self-cleaning pre-cleaners

3939409S SY-KLONE 40012; Used with: AP85036, AP85038 Pipe Assembly - Steel 4" x 12"

3939410S SY-KLONE 50012; Used with: 3971121S A rubber adaptor for the installation of Self-cleaning pre-cleaners

3939411S SY-KLONE 60012; Used with: AP85041, AP85042, AP85046, AP85047, AP85104, AP85105; A rubber adaptor for the installation of Self-cleaning pre-cleaners

3939413S An expansion plug that permits the installation of Sy-Klone pre-cleaners

3939417S SY-KLONE 9003WMESHKIT; A screen that permits the installation of Self-cleaning pre-cleaners

3939418S SY-KLONE 9003SCKIT; A screen that permits the installation of Self-cleaning pre-cleaners

3939419S SY-KLONE 9002WMESHKIT; A screen that permits the installation of Self-cleaning pre-cleaners

3939421S SY-KLONE 9001WMESHKIT; A screen that permits the installation of Self-cleaning pre-cleaners

3939441S Breather

3939442S Breather Service Kit

3939443S Hose

3939461S Fitting

3940104S CATERPILLAR 4M0189; O-ring gasket; Used with: FF5323, FF5337

3940105S CATERPILLAR 6V3907; O-ring gasket; Used with: LF3485

3940108 FIVE STAR MFG. 36203; Diesel Fuel Warmer; Replaces 3305782

3940356S 10" Rain Cap; Is included in 3941642

3940357S 8" Rain Cap

3940750S Base and Shaft; Used with: CH41102, CH41112, CH41101

3940756S Housing Assembly; Used with: CH41102, CH41112, CH41101

<p>3959754S DAVCO 102695 12V DC, 250W Fuel Heater Kit for use with FH230, FH232, FH233, and FH234 Series</p> 	<p>3960379S Clamp</p> <p>3960450S Replacement Lid & Wingnut for AP0450</p> <p>3960461S CUMMINS 3954906 Head and filter assembly Head used with FF5421, FS20000; Replaces 3940777S</p>  <p>3960500S Replacement Lid & Wingnut for AP0500</p> <p>3960502S Gasket; Used with: HF7999; Replaces 3916708S</p> 	<p>3961284S Primer Pump Fitting Set for Industrial Pro Dual/Duplex</p> <p>3961285S Primer Pump Fitting Set for Industrial Pro Triple/Triplex</p>  <p>3961286S DAVCO 910051CEG IP single primer assembly The primer pump assembly consists of a primer pump, bracket, hoses, vibration isolators, and all fittings.</p>

E. PRODUCT GUIDE

3961287S

DAVCO 910053ICEG IP Double/Duplex/Triple/Triplex primer pump assembly
The primer pump assembly consists of a primer pump, bracket, hoses, vibration isolators, and all fittings.

3961293S

DAVCO 390063CEG SP Single primer pump assembly
The primer pump assembly consists of a primer pump, bracket, hoses, vibration isolators, and all fittings.

3961294S

DAVCO 390064CEG SP Double/Duplex/Triple/Triplex primer pump assembly
The primer pump assembly consists of a primer pump, bracket, hoses, vibration isolators, and all fittings.

3961295S

CUMMINS 4919925 Primer Pump Fitting Set for Sea Pro Dual/Duplex/Triple/Triplex

3961296S

CUMMINS 4919918; Primer Pump Fitting Set for Sea Pro Single

3962017S

Filter head for ISC engine; Replaces 3912214S

3962018S

CUMMINS 3944987; Head used with FS1000, FS1022; Replaces 3914857S

3962094S

12V 150W heater for FH234 Series Fuel Processors

3962319S

Head Package Service Kit

3962484S

Head Package

3962607S

WIF harness length is 92" Purchase Complete from Davco, their p/n 102660FGD-92

3962763

Uses service part(s) 3928013S PTC heater kit - 12V

3962839S

STAUFF FPMRF090130; Used with: ST2060HH Service Part

3962855S

STAUFF FPMRF045070 Used with: ST2054HH Service Part

3962859S

STAUFF FPMRF014030 Used with: ST2048HH, ST2051HH Service Part

3962969

Fuel Filter Head

3963017

CUMMINS 4948443; Head, Filter, and Heater

3963018

CUMMINS 4995443; Head and filter assembly

3963173S

STAUFF NBRRF090130; Used with: ST2032HH, ST2033HH, ST2040HH, ST2041HH

3963177S

STAUFF NBRRF045070; Used with: ST2016HH, ST2017HH, ST2024HH, ST2025HH

3963181S

STAUFF NBRRF014030 Used with: ST2000HH, ST2003HH, ST2008HH, ST2009HH

3963500S

Washer; M8 plug included

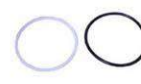

Is included in FH21049, FH21101, FH21102, FH21108, FH21045, FH21040, FH22263, FH22264, FH21107, FH21098, FH21099, FH21100, FH21047, FH21103, FH21048.

3963621S

STAUFF NBRSF045070 Used with: ST2016HH, ST2017HH, ST2024HH, ST2025HH

3964002S

STAUFF NBRSF014030; Used with: ST2000HH, ST2003HH, ST2008HH, ST2009HH

3964006S

STAUFF NBRSF090160; Kit; Replaces ST2023BDKIT

3964101S

24V stick heater (includes screws) Is included in FH21101, FH21040, FH21098, FH21047

3964354S

Hand pump (includes spring)

Is included in FH21040, FH21049, FH21101, FH21102, FH21108, FH21045, FH22263, FH22264, FH21107, FH21098, FH21099, FH21100, FH21047, FH21103, FH21048

3965311S

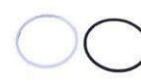

DAVCO 571102; Metal Bowl

3965412S

CUMMINS 4992118; Head and filter assembly

3965431S

STAUFF FKMSF014030; Used with: ST2000HH

3965432S

STAUFF FKMSF045070; Used with: ST2016HH
